

Wi-Fi Phone for Skype S0-20

Get More Out of Your Skype Experience.
Wireless. Free Calls. No Monthly Plans. Get Connected Instantly.

Wireless. Go Skype with Wi-Fi.

The Wi-Fi Phone for Skype S0-20 by IPEVO is a compact cordless phone designed to put the power of Skype into the palm of your hand.

With the S0-20, you will be able to enjoy free Skype-to-Skype calls, low-cost international and domestic calling to anywhere in the world - from the comfort of your home and office - with any available Wi-Fi connection.

(Note: This product supports any secure or open Wi-Fi network connection that does not require browser-based login or authentication)

No Computer Required. Get Connected Instantly!

Aesthetically designed for ease-of-use and portability, the S0-20 is pre-loaded with Skype software. Get connected without a computer or complex setting configurations.

Simply access your Skype account or create a free account on the phone, wherever you are. The experience of using Skype on the Wi-Fi phone is guaranteed to be every bit as good, if not better, than on your computer.

Experience true mobility in a much simpler and comfortable way today.

100% Skype-Integrated. 100% Functionality.

With a simple, user-friendly interface and full Skype integration, calling has never been easier. The brightly-lit LCD screen, backlit keys, and large menu icons ensure quick, intuitive navigation.

From locating contacts, making calls to reviewing call history, all the great features of Skype are right at your fingertips. The S0-20 Wi-Fi Phone is Skype-certified and comes complete with impeccable quality and functionality for the best Skype experience.

Globally Accessible. Wireless Network Security.

The S0-20 implements the 802.11b/g wireless standard, so it is highly complementary with nearly any standard Access Points available on the market. All standard wireless network encryption protocols, including WPA, WPA2 and WEP (equivalent to wired LAN security levels) are supported.

All you need to do is log in or create a new Skype account to start making calls. Incorporating a unique DSP echo cancellation feature, you are assured of uncompromised audio quality and secure conversations.

Is the S0-20 Wi-Fi Phone only for registered Skype users?

No. In fact, you can even use the IPEVO Wi-Fi phone for Skype to register for a free Skype account. If you are an existing user of Skype, you can simply use the same Skype name and password to sign into the Skype service, regardless of the version of Skype you were using on your computer previously (Windows, Linux or Mac OS X).

Does this model of S0-20 Wi-Fi Phone support other Skype services? Or is it only for making Skype-to-Skype calls?

Other than using the S0-20 Wi-Fi Phone for making Skype to Skype calls, you can utilize SkypeOut (making calls to mobile phones/landlines/overseas), make use of your Skypeln subscription and access your Skype Voicemail.

(Note: SkypeOut/Skypeln/Skype Voicemail are prepaid services. Skype credits must be purchased in advance.)

How do I import my contact list onto S0-20 Wi-Fi Phone for Skype?

All of your contacts associated with your Skype ID that are stored centrally on Skype's servers. Contacts will be loaded onto your Skype phone when you sign into your Skype phone. There is no need for manual importing of contacts.

What languages does the Wi-Fi phone for Skype support? I have Skype contacts from different countries. Will their contact information be displayed correctly?

The user interface and menu currently supports four languages, Traditional Chinese, Simplified Chinese, English and Japanese. The available language fonts for your Skype contact list also include these languages, plus it will display most European language correctly.

In addition, the S0-20 also supports the display of various kinds of special symbols and nicknames can be displayed correctly.

Skype's buzzing 24 hours a day, 7 days a week, worldwide. At peak periods, there are up to 23 million people online. What Skype can do is to connect business colleagues while saving time and money, and keep friends and families together, wherever they are in the world.

What Users Say?

Pros: Excellent interface, good hardware & sound quality

The S0-20 connects to Skype over WiFi, and allows you to make and receive calls, manage your Skype contacts, view call history, listen to voicemail and even search for Skype users. The entire user interface looks and feels just like Skype on your desktop, so operating the phone couldn't be easier.

Another Kind of Freedom - IPEVO Equips USO Pacific Region with Internet Phones

Military personnel and families can now call home for free

With approximately 300,000 American military personnel and family members in the Pacific Region and approximately 1,000,000 visits to USO Pacific centers in 2009, the "free phone calls" program - thanks to your partnership - has generated more buzz in our region than any other in-center program offered by USO Pacific.

- Elizabeth Lee, Director of Operations, USO Pacific

Make Calls Within 5 Minutes

What makes this phone so special? How about the fact that there's no need to connect to a PC of any kind for it to work.

Connecting to a wireless network is pretty easy; just key in the password. And when signing into a Skype account you have two options: sign into an existing account, or create one on the spot within the phone. Don't worry, it's a simple process. Within about 5 minutes I was ready to make calls.

- JRicardo Trejo from T3chH3lp.com Tech Blog

Skype Without a PC

There are hundreds - if not thousands - of services that allow you to chat in real time. The one that tends to rule the roost is Skype. You know you may need to contact people on your Skype list while you're traveling or away from your computer. Don't use your cell and rack up a huge bill. Just use the Skype Phone. Make your life a little easier.
